

- ◆ Saves space, time and money
- ◆ Up to 50% cost saving per meter point
- ◆ Up to 80% reduction in cabling and space
- ◆ Future proofs expansion needs

## ENMAT Multi Meter

The ENMAT Multi Meter is a metering system designed for applications where multiple meters need to be installed. It provides a high density system with simplified wiring and advanced features.

It's modular design allows for future expansion if required and it's autorotation feature allows the meter to correct for any current transformers which may have been installed the wrong way around.

If you are looking for a multiple metering solution which is space efficient, time efficient to install and setup, and future-proofs any installation for expansion then the ENMAT Multi Meter is the solution.

## ENMAT Multi Meter

- ◆ Modular design
- ◆ DIN rail Mount
- ◆ Modbus, Modbus TCP/IP, M-Bus
- ◆ Remote display
- ◆ 5 year warranty

One display and one communication port accesses and configures all Meter Modules.

Meter System & Meter Channels can store Real-World Names e.g Outside Lighting.

Communicates via data acquisition Energy Data Loggers.

ENMAT Multi Meter flexible design permits configuration and expansion from 1 to 10 meter modules.

Single Modbus request to 'master' will return energies from ALL slaves, allowing extremely fast response times – ideal for real-time monitoring. DIN rail mount.
