

- ◆ Fully MID Approved
- ◆ Built in GSM/GPRS
- ◆ Direct connect up to 100Amps
- ◆ Optional external antenna for installs with poor signal

ENMAT enLink Direct Connect MID Meter

The enLink DC100 is a single phase MID approved direct connect electricity meter with built in GPRS communications.

MID approval and built in GSM/GPRS communications makes the DC100 an ideal meter for feed-in-tariff (FITs) monitoring and other applications requiring import and export energy metering where there is bidirectional energy flow.

The DC100 is simple to install without any specialist knowledge or tools. Once connected the meter displays GSM/GPRS wireless signal strength on the LCD display.

- ◆ Auto data sent to ENMAT Energy Software
- ◆ Single phase 100A Direct Connect

ENMAT enLink Direct Connect MID Meter

This versatile meter can provide functionality over and above that required for Microgeneration Certification Scheme (MCS) metering making it suitable for many other applications.

Additional functionality includes Time-of-Use Rate Switching, Power Quality Recording, Active (kWh) and Reactive (kvarh) energy measurement across both import and export. These features can be accessed and configured remotely via the mobile phone network.
